PRICE THREE CENTS

#### ST. ANNE'S CHURCH

The Sunday School Reception Has Been Postponed

UNITED OFFERING SERVICE Sunday, Sept. 24th, The 14th Sunday

after Trinity. Divine service: 10.30, Morning Prayer

7.30 Evening Prayer & Address

Service on Wednesday at 7.30 P. M. AGED & INFIRM CLERGY PENSION FUND We are pleased to report that we butions to the Fund. One of tendollars, two, of two dollars, and the promise of

be the next? Any amount is accept-

The Rector of St. Anne's preached to members of the Fraternal Orders, of Townsend, Del., in St. Mary's Chapel on Sunday afternoon. A goodly number of the brethren were present and there was a hearty service. Service is held in Townsend every other Sunday afternoon at 3.30, and we would be glad to see members of St. Anne's present.

Mr. John S. Grohe, of Wilmington, Secretary of the Diocese, has been appointed by the Standing Committee to Stanley Townsend. attend the General Convention as substitute for Mr. Jefferson B. Foard, Junior Warden of St. Anne's Parish, who is unable to attend.

The reopening of St. Anne's Sunday School has been postponed until October 1st, to conform with the edict of the State Board of Health. We tru that one good result of this slight del will be that the school begins with full attendance. We have a capab body of teachers, all deeply interesta in their work; and we hope that the parents will realize that we have the welfare of the children at heart, and that irregularity and tardiness in attendance and carelessness in the preparation of assigned lessons, are just as disastrous to good results here as they would be in day school.

The parents are the only people who can tnoroughly rectify these defects and we feel that if only they realize this, they will understand how much we need their hearty and earnest co operation.

#### THE UNITED OFFERING SERVICE

The service at which the Triennial Offering of the Woman's Auxiliary in the Diocese of Delaware is to be formally presented will be held in Trinicy Church on Friday, Sept. 29th., (the Feast of St. Michael and All Angels,) at 10 30. The service will be in charge of the Bishop of the Diocese. This offering represents the united offering gathered by the women in the little blue boxes since the date of the last General Convention, and will form part of the great offering to be made by the Auxiliary at the General Convention in St. Louis, Mo. A cordial invitation is extended to all members of the Auxiliary throughout the diocese to be pregent at this meeting. And it is earnestly hoped that St. Anne's will

#### MY CHURCH AMD I

My Church is the place where the ove of God is revealed and th Unity of God is perceived. It is the of my affections, and the foretaste of nearly 25 yards and badly mangled. Heaven. I have united with it in It claims the first place in my God and man, to advance its interest by at Elkton. my faithful attendance, by reading the Holy Bible, by never neglecting Holy Communion, by contributing to its support, by meeting with my fellow members, by watching over its welfare, and by joining with them in prayer and praise and service; and that promise I this day renew, before God my Father, Jesus my Redeemer, and the Holy Spirit my Sanctifier.

Millinery Opening--Tuesday and of importance were fully discussed. The Wednesday, Sept. 26-27. Great Displays!

#### Celebrated Wedding Anniversary

Magistrate and Mrs. J. D. Carter, of Townsend, celebrated the fifty-fourth anniversary of their marriage Sunday.

#### SHOWER AND RECEPTION

A reception and shower were given Mr. and Mrs. Clyde L. Shockley at the home of Mr. and Mrs Earl M Shockley, Townsend, last Friday night. The couple were married two weeks ago at Elkton. Mrs. Shockley was Miss Alice Outten, daughter of Mr. and Mrs. George M. Outten, of Townsend. Many gifts were received.

The guests were: Mr. and Mrs. W. P. Wilson, Mr. and Mrs. W. C. Harris. Mr. and Mrs. Earl M. Shockley, Mr. and Mrs. T. B. Schwatka, Mr. and Mrs. L. B. Shockley, Mr. and Mrs. E. C. have received this week three contri- Reynolds, Mr. and Mrs. G. M. Outten, Mr. and Mrs. R. R. Reynlods, Mr. and Mrs. S. A. Collins, Mr. and Mrs. C. C. pledges for ten dollars more. > Our Formal Opening, beginning on today, Sept. 23d. Everybody invited to come and get their first peep at Autumn Millinery Fashions. L. M. SCOTI.

#### **OBITUARY**

#### JOSEPH ROEMER

After a long and useful life, Joseph Roemer, Sr., died at the home of his youngest son, Joseph Roemer, Jr., near McDonough, at 4.45 o'clock, Monday morning, aged 86 years. Deceased had only been ill for a few days and his death was due to the infirmities of old

Mr. Roemer was born in Germany, but came to this country when quite a young lad and located near Odessa. He engaged in farming and continued to follow that occupation until about 18 years ago and since that time had made nis home with his youngest son.

He leaves to mourn his death three laughters and two sons. They are Mrs. John Heldmyer, Mrs. Frank vcClain, Mr. George Roemer, all of Odessa, Mrs. B. F Gallagher, this town, and Mr. Joseph Roemer, near McDonough. He leaves seventeen grand-children and four great-grand-children.

The funeral services were held at the home of his son, Thursday afternoon, at one o'clock, and were in charge of the Rev. H. C. Shipley, of Odessa. was made in Drawyers

#### Federal Building Near Completion

Work is progressing rapidly on Smyna's new Post-office Building. The John Armstrong, Misses Emily Allee inside work is finished, the concrete erty, of Harberson, Del. A delightful building over in contract time, October sale on an after September 25th, 1916. evening was spent socially. Ice cream, | 20, Contractor King expects to do it by November the 1st.

#### **BASE BALL NOTES**

Academy Park on Saturday afternoon was the scene of a most sensational game between the locals and the Wildel aggregation, of Wilmington. There was two knock downs-one by the game and the other by a clean-cut knock-down by umpire Pennington by one of the visiting club because the use of a vile name for his decision in the ninth inning. It was a just punishment the second time, and may act as a warning-that visiting teams cannot come here and act the part of rowdyism when they see defeat for their teams The game was a close exciting one up to the eighth session, only one run bei n scored by either team up to the eighth, when Wildel scored 3 runs, the game being 3 to 1 in their favor when the locals came to bat in the closing ninth. Salters passed Finn, 1. Gibbs popped up a little foul, which was captured, Sloniker was passed, Heller sent a safety over rhird and all the sacks were filled with only one out. It was here second baseman, Strawbridge disputed the decision of umpire Pennington, who was umpiging the bases, called Finn safe at third, that Strawbridge used the vile name, and down he went like a log. Notwithstanding some of the visitors wanted to finish the game, their manager would not consent and the game was forfeited 9 to 0. The incident was, and is deeply regretted here, as most excellent order has always heretofore attended the games. The score by in-

NEW CASTLE ON SATURDAY The strong New Castle Club will visit Academy Park on this (Saturday) afteroon, and a close game is expected.

#### INFANTILE PARALYSIS

A startling proof that flies bred i pen manure piles caused Philadelphia's ague of the dread infantile paralysis! It has been discovered that the most cases were found in the neighborhood of stables with uncovered manure piles. The city wards having the most stables in every instance had the greatest num-

ber of children stricken! This is a confirmation of the theory of the famous expert Dr. Simon Flexner, of the Rockefeller Institute, Chicago that flies were the chief agency in spreading this awful scourge of childood-infantile paralysis.

Thus, in the 52d ward with 404 stables, there were 59 cases with 19 deaths-many more than in any other Now what is our own Board going to do about the matter? Protect the manure piles or the babies? Now is the time to pass that ordinance, and give ample time to stable owners to cover the dangerous manure piles before the next crop of disease carrying flies is born in them.

SYNOPSIS

-12la Chesnayne, a belle of New is forced into marriage with France, is forced into marriage with Commissaire Cassion, henchman of Governor La Barre, who is plotting to oust La Salle and his garrison from the frontier Fort St. Louis, on the Illinois river. Adele had overheard the plotters say she had inherited a great fortune from her father and they had kept it from her. La Barre and Cassion learned of the girl's knowledge—thus the marriage and the hurried departure of Cassion and a company for Fort St. Louis, The bride refuses to share giveping quarters with her husband. Sin has but one friend, young Rene d'Artigny, a guide. He is chary of helping her. Chevet, the girl's uncle, one of the party, is found murdered. A flerce storm catters and wrecks the boats. Adele is rescued by D'Artigny. They learn they had thought one another guilty of Chevet's murder. Adele loves her respectively the storm of the party hide from a search party and with a new found friend, Barbeau, proseed overland toward Fort St. Louis.

Madame Cassion owes her life to D'Artigny. She is now in his hands. She loves him. She has

a high sense of honor and obli-Will her conscience force her to go on to the fort. where her husband is, and tell him she thinks her real lover may be a murderer—giving her reason for the belief? In this installment the author gives a vivid portrayal of her dilemma very time her life is in grave danger.

#### \*\*\*\*\*\*\* CHAPTER XV-Continued.

Madame Cassion, D'Artigny and Barbeau are making their way in canoe and on foot to Fort St. Louis.

I was but a girl in years, excitem was still to me a delight, and I had dstened to so many tales, romantic wonderful, of this wilderness fortress perched upon a rock, that my vivid magination had weaved about it an tmosphere of marvel. The beauty of the view from its palisades, the vast course of Indians encamped on the plains below, and those men guarding ts safety-the faithful comrades of La Salle in explorations of the un-known, De Tonty, Boisrondet, and all the others, had long since become to my mind the incarnation of romantic adventure. Wilderness born, I could comprehend and appreciate their toils and dangers, and my dreams centered about this great, lonely rock, on which they had established a home. But the end was not yet. Just below the confluence of the rivers there was a vilge of the Tamaroas, and the prov of our canoe touched the bank, while D'Artigny stepped ashore amid tangle of low-growing bushes, that he might have speech with some of the warriors, and thus learn conditions at the fort. With his foot on the bank, he turned laughing, and held out his and to me.

"Come, madame," he said, pleasant our western tribes; it will interes

I joined him gladly, my limbs feeling awkward under me, from lon gramping in the boat, yet the clim was not difficult, and he held back the boughs to give me easy passage. Beopen space, but as we reached this both paused, stricken dumb by horror at the sight which met our view. Th ground before us was strewn with lead, and mutilated bodies, and was plack with ashes where the tepees had burned, and their contents scattered broadcast.

Never before had I seen such view ruelty, and I gave utterance to a sudsob, and shrank back against D'Artigny's arm, hiding my eyes with my hand. He stood and stared, mo tionless, breathing heavily, unconsciously gripping my arm.

'Mon Dieu!" he burst forth, at last. "What meaneth this? Are the wolves again loose in the valley?"

He drew me back, until we were concealed behind a fringe of leaves, his whole manner alert, every net of the woodsman instantly awakened.

Remain here hidden," he whispered, "until I learn the truth; we face grave peril below.

He left me trembling and white-tipped, yet I made no effort to restrain him The horror of those dead gripped me, but I would not have him know the terror which held me captive. With utmost caution he crept forth and I tay in the shadow the covert, watching his move ments. Body after body he ap seeking some victim alive and able to tell the story. But there was none. At last he stood erect. were on that awful spot, and came back to me.

ot one lives," he said soberly d there are men, women, and chil iren there. The story is one easily told-an attack at daylight from the thting; a massacre of the helpless

I saw other signs. e Iroquois." I echoed incredu or that name was the terror of

ny childhood. "How came these savso far to the westward?"

"Their war parties range to the sat river," he answered. "We folved their bloody trail when first we to this valley. It was to gain ion from these raiders that the gathered about the fort. at the fiends twice, and drove Come. Adele. we must return thoe, and consult with Barseen much of Indian

bank, Barbeau holding it with grasp on a great root. He must have read our faces some message of alarm. for he exclaimed before either of us ould speak:

"What is it-the Iroquois?" "Yes; why did you guess that?"

"I have seen signs for an hour past which made me fear this might be true. That was why I held the boat so close to the bank. The village has been attacked?"

"Ay, surprised and massacred; the ground is covered with the dead, and the tepees are burned. Madame is half crazed with the shock." Barbeau took no heed, his eyes

carce glancing at me, so eager was he to learn details.

"The fiends were in force, then?" "Their moccasin tracks were everywhere. I could not be sure where hey entered the village, but they left by way of the Fox. I counted on the sand the imprint of ten canoes."

"Deep and broad?" "Ay, war boats; 'tis likely some of them would hold twenty warriors; the beasts are here in force."

It was all so still, so peaceful about us that I felt dazed, incapable of comprehending our great danger. The river swept past, its waters murmur-ing gently, and the wooded banks were cool and green. Not a sound awoke the echoes, and the horror I had just witnessed seemed almost a dream.

"Where are they now?" I questioned faintly. "Have they gone back to their own country?"

"Small hope of that," answered "or we would have met D'Artigny.

The Ground Before Us Was Strewn With Dead.

with them before this, or other signs of their passage. They are below. either af the fort, or planning attack on the Indian villages beyond. What think you, Barbeau?"

"I have never been here," he said lowly, "so cannot tell what chance the red devils might have against the white men at St. Louis. But they are below us on the river, no doubt of that, and engaged in some hell act. I know the Iroquois, and how they conduct war. Twill be well for us to think it all out with care before we have the survey of the s venture farther. Come, D'Artigny, tell me what you know-is the fort one to be defended against Iroquois raiders?"

"'Tis strong: built on a high rock. and approachable only at the rear. Given time, they might starve the garrison, or drive them mad with thirst, for I doubt if there be men enough there to make sortie against a large

"But the Indian allies-the Algon-

"One warwhoop of an Iroquois would scatter them like sheep. They are no fighters, save under white leadership, and 'tis likely enough their villages are already like this one yonder, enes of horror. I have seen all this before, Barbeau, and this is no mere raid of a few scattered warriors, seeking adventure and scalps; 'tis an organized war party. The Iroquois have earned of the trouble in New France, of La Salle's absence from this valley: they know of the few aghting men at the Rock, and that De Tonty is no longer in command. They are here to sweep the French out of this Illinois country, and have given no warning. They surprised the Indian villages first, killed every Algonquin they could find, and are now besieging the Rock. And what have they to oppose them? More than they thought, no doubt, for Cassion and De la Durantaye must have reached there safe ly, yet at the best, the white defendwill scarcely number fifty men. and quarreling among themselves like mad dogs. There is but one thing for

us to do. Barbeau-reach the fort." "Ay, but how? There will be death now, haunting us every foot of the

D'Artigny turned his head, and his eyes met mine questioningly.

"There is a passage I know," he said gravely, "below the south banks yonder, but there will be peril in it said gravely, "below the south banks yonder, but there will be peril in it— peril to which I dread to expose the peril of our situation had tendency to the truth of what caused my marches willows will be peril of our situation had tendency to the truth of what caused my marches will peril of our situation had tendency to the truth of what caused my marches will be peril of our situation had tendency to the truth of what caused my marches will peril of our situation had tendency to the truth of what caused my marches will peril of our situation had tendency to the truth of what caused my marches will peril of the truth of what caused my marches will peril of the truth of what caused my marches will peril of the truth of what caused my marches will be peril of the t

I stood erect, no longer paralyzed

by fear, realizing my duty. your plan "

The Words of Love. His eyes brightened, and his hand

CHAPTER XVI.

"The spirit of the old days; the words of a soldier's daughter, hey. Barbeau?"

"A La Chesnayne could make no ther choice," he answered loyally. But we have no time to waste here n compliment. You know a safe pas-age, you say?"

"Not a safe one, yet a trail which may still remain open, for it is known o but few. Let us aboard, and cross to the opposite shore, where we will hide the canoe, and make our way through the forest. Once safely afoot

onder. I will make my purpose clear. A dozen strokes landed us on the other bank, where the canoe was drawn up, and concealed among the bushes, while we descended a slight declivity, and found ourselves in the silence of a great wood. Here D'Artigny paused to make certain his sense of direction.

"I will go forward slightly in advance," he said, at last, evidently havng determined upon his course.

"And we will move slowly, and as

noiselessly as possible. No one ever knows where the enemy are to be met with in Indian campaign, and we are without arms, except for Barbeau's gun."

"I retain my pistol." I interrupted "Of small value since its immersion in the lake; as to myself. I must trust to my knife. Madame, you will fol-low me, but merely close enough to nake sure of your course through the woods, while Barbeau will guard the rear. Are both ready?"

"Perhaps it might be well to explain nore clearly what you propose," said he soldier. "Then if we become sephe soldier. arated, we could figure out the proper

direction to follow."

"Not a bad thought, that. It is a rough road ahead, heavily wooded, and across broken land. My route is almost directly west, except that we bear slightly south to keep well away from the river. Three leagues will bring us to a small stream which empties into the Illinois. There is a faint trail along its eastern bank, which leads to the Rock, where it is possible for one knowing the way to attain the palisades of the fort. It we can attain this trail before dark we can make the remaining distance by night. Here, let me show you.' and he drew with a sharp stick a hasty map on the ground. "Now you understand; if we become separated, self. keep steadily westward until you ch a stream flowing north."

In this order we took up the march. nd as I had nothing to bear except a planket, which I twisted about my shoulders, I found little difficulty in ollowing my leader. At first the underbrush was heavy, and the ground very broken, so that oftentimes I lost sight entirely of D'Artigny, but as he onstantly broke branches to mark his assage, and the sun served as guid nee, I had small difficulty in keeping the proper direction. To our right along the river appeared masses of solated rock, and these we skirted closely, always in the shadow and silence of great trees. Within half an hour we had emerged from the retarding underbrush, and came out into

an open wood, where the walking was much easier. Assured that this must be the water we sought. I sank to the ground, eager for a moment's rest, but D'Artigny tireless still, moved back and forward along the edge of the forest to assur nimself of the safety of our surroundings. Barbeau joined him, and ques

"We have reached the trail?" beside the shore yonder; se you anything of Indian tepees across

the stream to the left?" "Below, there are wigwams there just in the edge of the grove. can see the outlines from here; but I make out no moving figures."

Deserted then; the cowards have run away. They could not have been attacked, or the tepees would have

been burned." "An Algonquin village?"

"Miamis. I had hoped we might gain assistance there, but they have either joined the whites in the fort. or are hiding in the woods. lent we must save ourselves.' "And how far is it?" "To the fort? A league or two, and

rough climb at the farther end hrough the dark. We will wait here until after dusk, eat such food as we ave without fire, and rest up for a bit of venture. The next trip will test us all, and madame is weary enough already."

"An hour will put me right," I said. miling at him, yet making no attempt to rise. "I have been in a boat so ong I have lost all strength in my

"We feel that, all of us." cheerly, insult you when he sees us together but come. Barbeau, unpack, and let as to let his insolence go beyond reus have what cheer we can."

What course do you think Adele would follow if she should learn that it is impossible to reach the fort? 

(TO BE CONTINUED.) MORE NERVY THAN THE MALE

Writer in Toledo Blade Comes Boldly Forward With a Tribute to the Fair Sex.

Tell a man that tight belts cause appendicitis and he loosens his belt at once, remarks the Toledo Blade. Warn him that stiff hats make the hair fall out and he carries his hat in his hand until he can find a soft one to put on. This is one of the striking differences between men and women. You cannot scare a woman with any such threat. It must be centuries since women were told that stays would be everlasting ruin to them. But is there any decrease in the use of the would invite ills with the most terrifying names. Fur collars would weak en their resistance to murderous gern s. But what did the women think of these cautionings? About as much as you would think of the hum ming of a gnat. They were the tight skirts until they were blessed wed ready to abandon them. They bared their necks to the wintry breezes as if there were no such thing. You may be sure that the fur collars will not come off until they become unfashicnable. You may be equally sure that women will be callous to the advice of the Cleveland doctor now urging the discarding of high heels be cause they make bow legs. The female of the species is more

nervy than the male.

Mystery in Unclaimed Novel. imed" novel is the latest mystery of the London literary world. Some time ago an anonymous manu script was left with a pro lishing concern, which decided, in due course, to publish the same. Upon inquiry it was discovered that the author had not troubled to leave either name or address when he handed in his MS. Now all sorts of romantic conjectures have been made in connection with "Anonymous'" identity and ultimate fate—without, naturally. hurting the book's chances when it anpears shortly.

LESSON FOR SEPTEMBER 24

REVIEW. READING LESSON-II Cor. 4:1-5:4. GOLDEN TEXT—We look not at the things which are seen, but at the things which are seen, but at the things which are not seen. For the things which are seen are temporal, but the things which are not seen are eternal.—II Cor.

A map is essential to an understanding of Paul's labors and adventures especially a present-day map, with its modern names of the places which he visited. It should be used in teaching this lesson, and New Testament his-

tory generally. It will cause the lessons to relate themselves more closely to the world as we now know it. During the past quarter they have extended over a period of about seven years, from approximately A. D. 50 to 57, and are all centered about the life and teaching of Paul. It is difficult to attempt a logical review. A number of lessons have been introduced from the letters of Paul, which are not chronological in the development of the church. It might be well, perhaps, to consider first the leading events in the life of Paul and second the prominent characteristics of Paul's life as we have had them presented to us, and also to consider six of the cities in which Paul founded churches in Europe, studying their modern names and conditions and looking into the difficulties and dangers which he encountered. In Lesson One we have the record of Paul's untiring activity, and his persistent use of the Scriptures. Every one of his sermons was confirmed by the Word of God. Lesson Two preents his interest in those who were converted in his ministry; also a suggestion as to his unceasing prayerfulness on their behalf. Lesson Three presents his tact and wisdom in preaching the Risen Christ, and his mphasis upon the need of repentance. Lesson Four gives a suggestion of his antiring activity in the midst of great discouragement and in the fact of bitter apposition. Lesson Five reveals his persistent determination to know and to preach nothing save Jesus Christ and him crucified. Lesson Six s Paul's panegyric on love as the supreme gift. Lesson Seven is an exposition of the duty and blessedness of cheerful giving. In it is given a new beatitude of Jesus, "It is more blessed to give than to receive," which nowhere else recorded. Lesson Eight, another suggestion as to his courage. Lesson Nine emphasizes humility, compassionate love and a fearless declaration of the whole cou sel of God. Lesson Ten presents his

forgetfulness of himself and his eager-ness to preach Christ even when threatened by an unrestrained mob Lesson Twelve again presents his forgetfulness of himself, and his eager seizing of every possible opportunity to preach the Lord Jesus.

Turning to the cities that Paul visited, we first encounter Philippi (now in ruins). This is the first city in Eu-

rope where there was a Christian church, and it was one which Paul especially loved. Though he was driven from it by a mob, and escaped by means of an angel, yet his letter to that church is a revelation of his feeling toward his first European congregation. Thessalonica, the modern Saloniki in Macedonia, formerly belonged to the Turkish empire in Europe. Here Paul founded a church, consisting of Jews and Greeks. Paul is accused of turning the world upside down, and teaching Jesus to be the Christian's king. For this he was accused of treason against Rome. Two pistles were written to the church in hich he does not record any faultinding. This church has been called the "Church Beautiful." Athens was then, as now, the chief city of Greece and one of the thre most renown cities in the history of the world Paul's famous address on Mars hill was treated with great indifference. His stay was short, and never after-wards do we find him showing forth his learning, but ever after he expresses his determination to know nothing save "Jesus Christ and Him crucified." (I. Cor. 2:1, 2).) Corinth was a great commercial city. At present the original site is in ruins, but the new Corinth has been built three miles away, and is today a city of approximately 15,000 population. Paul spent a year and a half here, preach ing and teaching, and supplemented this with a period of three months of service. It was a worldly and wicked city, and yet Paul here founded his largest church, converted from heathenism. Paul has written some of the wisest, most glorious and heavenly and at the same time necessary truths that have ever come from the pen of man to this charch in Corinth the great treatise upon church government. Ephesus was in the province (in Asia Minor) and is now in ruins, although a small village is near In this city Paul formed a church.

here he worked for nearly three years.

During this time we have the story of the burning of the books of magic of the silver shrine of Diana, and of the Ephesian riot which compelled Paul to leave the city.

Paul afterwards revisited the churches he had founded in Europ and about 62 A. D. wrote a letter to the Ephesian churches, some six years after he left them, and while he was a

risoner in Rome. The journey to Jerusalem, starting from Philippi (now in ruins) where Luke joined Paul with the Gentile church's collection for the poor, is the concluding portion of our les

## **CIVILIAN BOARD**

Twenty-Four Scientists Now Government Officers.

HEADED BY THOS. A. EDISON

Secretary Daniels Meets Members Of the Navy Civilian Consulting Board and Predicts They Will Do Much.

Washington.-Twenty-four of America's foremost scientists, comprising the Navy's civilian consulting board. headed by Thomas A. Edison, took the oath of allegiance to the United States as officers of the Federal government. The oath was administered in the office of Secretary Daniels, preliminary to organization of the board under the new law giving it a legal status.

Later the scientists were taken on board the naval yacht Dolphin for a cruise down to the Southern Drill Grounds off the Virginia Coast to witness target practice maneuvers of the Atlantic fleet.

Before Mr. Edison arrived at the Navy Department he went to Mount Vernon, Va., the home of George Washington, made a personal inspection of the mansion, and planted an elm tree in the yard. He was asked to inspect the electrical wiring of the house, which he did, pronouncing it safe.

Secretary Daniels formally welcomed the scientists into the Federal service and predicted that their enlistment would do much to restore American prestige upon the seas and assure the "glorious future of cur navy and our

country." Reviewing the problems which faced Europe at the beginning of the war, the Secretary said one of the chief difficulties the belligerents had to meet in preparing for the struggle was the need of co-operation between civilian and naval experts, engineers and

At their meeting the members of tha board elected Thomas A. Edison as chairman, William L. Saunders and Peter Cooper Hewitt, as vice-chairmen and Thomas Robins, as secretary. Considerable time was devoted to the discussion of plans for the establishment of the \$1,500,000 naval research laboratory and a committee was appointed to report to the board as to the best site for the laboratory. This committee consisted of Thomas A. Edison, Dr. W. R. Whitney, Dr. L. H. Backeland, Frank J. Sprague, Thomas Robins and

Lawrence Addicks. Thirteen sites were mentioned including: Haverstraw Point, Croton Point, Fisher's Island, Staten Island and points in the Chesapeake Bay and ound Norfolk, but Annapolis was the place most favored. There is already aboratory there. The decision was deferred.

TROOPS ORDERED HOME.

Pennsylvania Regiments Will Leave

the Border As Others Arrive. San Antonio, Tex .- Three regiments of Pennsylvania infantry will be sent home from the border when the North Carolina guard, three regiments strong, reaches its station at El Paso, it was announced at Southern department

headquarters. The regiments released probably will be the First, Second and Third of the

First Pennsylvania Brigade. General Funston has decided that when the advent of fresh regiments of guardsmen permits the release of organizations which have seen service on the border, the regiments which first came South will be the first to return home. In this instance priority would go to the First, Second and Third Regiments, although final decision will be left to Major General

MARSHALL WILL RUN AGAIN.

vania division at El Paso.

Clements, commander of the Pennsyl-

Vice-President Is Notified Of His Re-

nomination. Indianapolis Ind - Vice-President Thomas R. Marshall was notified of his renomination for vice-president on the Democratic ticket, and formally accepted the honor. The ceremonies were the third of the kind to be held in Indianapolis within the last few weeks. The other two notifications were for J. Frank Hanly, the Probibition presidential candidate, and Charles W. Fairbanks, Republican vice-presidential nominee. A large number of prominent Democrats, in cluding National Chairman Vance Mc-Cormick, from all over the United States were present at the notification.

PERSHING FOR MAJOR-GENERAL His Promotion To Vacancy In the Grade Deemed Probable.

Washington. - Brig.-Gen. John J. Pershing, commander of the American punitive expedition in Mexico and ranking brigadier of the army, probably will be made a major genera!, a vacancy in that grade having been created by the death of Major-General Mills. A successor to General Mills as chief of the Bureau of Militia Affairs has not been selected.

CONFEDERATE DRUM RETURNED.

Massachusetts Continentals Guests Cf Virginia Guards.

Richmond, Va.-North and South shook hands in the White House of the Confederacy, now a museum of the Confederate Memorial Literary Society, when the Worcester Continentals returned a Confederate drum captured en a battlefield near Winchester, Va Crowds lined the streets and cheered as the Continentals, escorted by the two battalions of militia remaining in the mobilization camp here.

CUBLISHED EVERY SATURDAY MORNING M ddletown, New Castle County, Delaware

#### -BY-The Middletown Transcript Co.

(INCORPORATED)

LONG DISTANCE 'PHONE NO. 37.

Entered at the PostOffice as second-class matter WIDDLETOWN, DEL., SEPT. 23, 1916

#### **OUR PRIMARY ELECTION**

ON this Saturday, the 23d, the County Republican primary election is held. A large number of able and worthy candidates are offered for the voter's choice. Amid such a plethora of richness it were invidious for The Transcript to dictate a choice. "Let the best man win", should be our slogan for the voters.

Yet for our own local candidate for sheriff, Joshua Z. Crossland, we will be pardoned for uttering a few words of well-merited praise, as a gentleman exceptionally well equipt in every particular to exercise justly and well the duties of that responsible office.

Of one thing, finally, we teel assured: when the ballot boxes close, such a ticket of able and reputable citizens will have been selected for the various offices as must commend itself to the favorable consideration of all citizens.

#### WILSON'S BAD EXAMPLE

NEW YORK CITY has a big railway strike on hand, and Theodore Shonts, the head of two of the larges companies, curtly refuses to arbitrate the difficulty.

This sort of arrogance was formerly the usual attitude of Capital towards Labor. In the great Coal Strike Roose velt insisted upon arbitration, and since then both Capital and Labor had beer showing a disposition to settle these contests peacefully, until Mr. Wilson in his itch for office and thinking thereby to capture the labor vote," repudiated arbitration, by encouraging the trainmen in the late railroad difficulty to take the unreasonable position of refusing this rational method of settling their

Mr. Wilson thus deliberately lent him self to the evil cause that would use the bludgeon in place of arbitration, and his reactionary act that sought to undo the good wiser men had accomplished after long years of struggle, is already bearing fruit in this arbitrary refusal of Mr. Shonts to arbitrate his railway strike.

Will the country suffer Mr. Wilson in this mad fashion to tear down the useful edifice of Arbitration Roosevelt and others builded, and upon its ruins to erect some lawless temple of Anarchy Never. They will shortly thrust him out of the great trust he has with his manifold follies and selfishness abused

#### ROOT THEM OUT!

"Scranton, Sept. 16 -Industrial workers of the World are accused of setting off dynamite that wrecked the home of Frank Loughney, of Brock st., Pittston, early today. Mr. and Mrs. Loughney were seriously injured by the explosion, and other members of the family had narrow escapes.

Loughney is employed at one of the mines where the "I. W. W.'s" quit work, and he refused to join their ranks. Threats were made, it is said, that his home would be blown up.

The new high school in Duryea was destroyed by fire early today, causing a loss of \$50,000. There is a suspicion that the "I. W. W.'s" started the blaze."—Ex.

Many of the worst diseases that have afflicted, and still do afflict, our body politic, are of foreign importation.

We have a notable illustration of this in the outrageous career of lawlessness, of wholesale arson and murder exhibited by this society of the Industrial Workers of the World whose members are almost if not quite all, foreigners.

These ignorant, brutal people from Europe have for generations been ground down under the heels of their native tyrannies of emperor or czar, and strange to say, the moment they reach our land they begin to abuse its hospitality. Unfitted to use the glorious privileges of freedom, they mistake unbridled license for liberty, and thru their systematic violations of all law and order have become highly dangerous

to our country. They should receive the same sharp medicine that in 1877 was given another society of foreign thugs, the Molly Maguires, who for nearly a quarter of a century in the coal regions of Pensylvania had indulged in a like riotous campaign of burning, intimidanion and murder. President McGowan of the B. & O. railroad, then state prosecuting attorney, broke the Society up by bring-

ing many of its members to the gallows. These I. W. of the W. are a set of vicious anarchists defying all law and common right with their bombs and torches, and should be hunted down like so many ravening wolves, to which men justly deny all quarter and mercy.

#### · DEMOCRACY SQUIRMING

MR. HUGHES has been exposing some of the many blunders of Mr. Wilson in his foreign policies, and his supporters, smarting under the shame of it and unable to deny the truth of it, are weakly protesting that "politics should stop at the water's edge". Could anything be more preposterous!

Certainly, let the president alone give him a free hand to play any crazy prank he please with the rights and honor of the Nation! More than any of those who have gone before him than even the autocratic Jackson, he has made the office of the executive encreach upon the other departments of government until he has almost reduced a compliant Democratic Congress to a nullity. Now make it lese majesty to criticise in the press or on the stump any act of his, and he will be able to realize to the full the autocratic idea he has but in part illustrated.

"Let us alone" was what the advo cates of slavery asked and for years received. "Let us alone", cried the Democratic solid South when it tried to destroy the Union, and the sons of the Democrats who in the North re-echoed those demands, are now asking the same immunity from criticism for their blundering president.

But it cannot be. Mr. Hughes is al ready answering their absurd demand by giving them more and sharper doses of the same unpleasant corrective medicine, and to use the jesting phrase of the hour, "the worst is yet to come" For when that super-dreadnaught of political oratory, Theodore Roosevelt, unlimbers his 15-inch guns, the now squirming Democracy will simply go frantic!

OUR SANITARY INEFFICIENCY.

Sanitary practices in this country are, justly condemned in the last re port of the United States public health service on typhoid. The statement that last year 30,000 deaths were recorded and that 400,000 persons were incapacitated shows that there is a substantial basis for the starting of an "educational compaign." That thousands of lives can be saved every year by intelligent work is certain, because typhoid is a disease that can be prevented. Polluted drinking water is the most common carrier of typhoid Too little attention is given to the drainage of large watersheds from which city supplies are taken and to the keeping of filth out of springs and wells in the country districts. Carelessness and ignorance are the under lying causes of the epidemics in cities and the isolated cases on the farms, and there is no excuse for either in these days of sanitary research and achievement. An interesting section of the report is the one on "antityphoid inoculation or vaccination"the popular notion that this remedy is infallible is contradicted. "The protection is relative, not absolute:' inoculation is "not to be regarded as a substitute for sanitation," the report says. Life and health are best conserved by keeping the typhoid germs out of water supplies.

things that a miner can encounter which are more unwelcome to him than a deep vein of quicksand. That is what has been struck at a Michigan iron mine. In quicksand the ordinary procedure of timbering excavating is done is impossible. In most instances the work must be done in much the same manner as a caisson is sunk. This makes necessary the construction of a casing by bolting together heavy timbers equally about a foot in thickness. At the bottom of each wall of this timbered "chimney" a cutting shoe is trimmed on the inside so as to assist the shaft in sinking under its own weight. All the material beneath the walls of the structure is in this way squeezed, or cut, into the confines of the casing, while the latter gradually sinks as the excavating is carried on. As rapidly as the shaft sinks into the earth additional timbers are bolted in place on top, this operation continuing until

It is conspicuously suggestive of the permanence of dramatic art that on the Berlin stage the works of Shakespeare hold place for popular presentation as usual. It is a recognition of the acceptance of the intellectual and the sympathetic quality which cannot be mistaken. On the other hand, in London restaurants, the familiar airs of the Contes d'Hoffman, the Barcarolle and other productions of the same master, have been howled down. They are alien, hostile, because of their authorship. Yet Offenbach's music is essentially French in flavor The contrast indicates a broadminded spirit in the popular sense. Art is not concerned in warfare; it is to be viewed and enjoyed for art's sake And these popular demonstrations would perhaps be conclusive were it not for the horrible destruction wrought, without necessity or reason, in the German advance through alien and hostile territory.

Democratic WORLB Long Had Monopoly of This Idiocy But Opposite Party Is Infected.

STRING OF INTERROGATIONS TO FEASE WILSON IDOLATERS

Questionnaire No. 1-Will All the Wilson Notes Be at His Notification? -How Did Fool Free Trade His Your Line of Business Just Before the Battles Began?-When the War Bables Die Will You Weep at the

The question habit grows. You may ask a question of any one. Why should the dear old public escape? Here are a few from The New York Sun for the man in the street:

De you approve of the Rivers and

Do you want four years more of watchful waiting with the National Guardsmen undergoing military training in a tropical climate in midsummer?

Do you hold that the duty of the United States is to serve humanity and let its own citizens be killed and outraged?

Do you feel proud of notes with noth ing behind them? What do you think of the Vera Cruz

adventure? Would you like to have been an Amer-

ican soldier at Carrizal? Do you love Carranza? Do you believe in a financial regime

conducted largely in the interest of one section of the country? Do you desire to out the Philippines ose in order that Japan may gobble

them? Do you want four more years of Daniels?

Do you approve of wrecking the diplomatic service to provide jobs for deserving Democrats? Are you in favor of inflation?

Do you believe in preparedness for a flood of cheap European wares as soon as peace comes? Have you noticed the significant in-

crease of imports in the past year, despite the war? How did fool free trade hit your line of business before August, 1914?

And your friends? Were you all cheered up by the Underwood tariff bill?

Do you think the doubling of the income tax is fair while millions worth of competitive imports come in free? Where are you going to be when the war babies die and business slips back to the cold, hard, normal basis?

Can you conceive of any possible

another Presidential term like the Will you perpetuate sectionalism, greed, Ignorance, stupidity—general ineptitude in Congress?

ATTRACTS BUSINESS MEN.

Mr. Hughes has not tried to scare anybody, but has merely portrayed the errors of the present Administration and set forth certain principles on which the affairs of the country should be managed in the future.

There is a political logic in this por mind of the voter is expressed by the

"He is the kind of man we want to

steer us through.' This has been said by many a business man. The qualities seen in Mr. Hughes are poise, a strong, sane mind, incerity and a willingness to sacrific life, physical or political, to the good of the country. Nor is there any question as to the quality of nerve to meet ginning March 4, 1917.

HOME OF AVERAGE MAN.

"But America is not simply a land for the man of special taient or of distinguished aptitude. This is the home of the average man, the ordinary man who is doing his best, whatever, by tal ent or aptitude and in our large industrial occupations where thousands are gathered together in one service, we want a recognition of human brotherhood in providing for the welfare of those who make the wealth of this great country.

"We want workingmen to be safeguarded from every injury that can be prevented. We want the health of the workingmen looked after; every means provided which co to the proper standpoint of living; every means provided for proper recreation; appropriate means for education, for voca-tional training. In short the workingman who is on the job and expects to continue in that job ought to feel that he is doing something worth while for a community that appreciates it and gives him a fair chance to lead a happy and decent life.— From Mr. Hughes' speech at

To the Horseman

Remember that a horse is only flesh and blood and not sheetiron. He gets tired, hungry and thirsty, and for goodness sake treat him accordingly. Because he is a lively horse and you are paying his hire, treat him white just

Remember that someone else rode him yesterday and another will probably do so tomorrow.

Give your horse the same kind of a deal you yourself would demand if you were in its place. Even a bronco has "feelin's" and will appreciate your This Office thoughtfulness.

#### FARMERS SIZE UP HUGHES AS "PRETTY GOOD FELLOW"

Fargo, N. D.-Charles E. Hughes ampaigned for the first time among the sturdy farmers of the eastern part of North Dakota and left behind him the reputation of being a "pretty good

He was forced to undergo a critical Mr. Hughes preached the doctrines of government efficiency, American ism, tariff as protection to the farmstance won applause, despite the fact that the farmers are not the strong est advocates of the last named issue. They cheered for preparedness the

that it meant not militarism, but ability to uphold national honor. As they cheered for Mr. Hughes, one broad-shouldered old farmer said "it's because there's something about him that makes you believe he's telling the truth."

oudest when Mr. Hughes told them

DENIES ASSAILING MR. HUGHES.

Percy Mackaye Writes He Never Saw "Authors' Letter" With

His Name Appended. Percy Mackaye, playwright, whose name appeared as one of the signers of the so-called "authors' letter," published in the newspapers last week, knew nothing about the matter until after publication, according to a statenent given out yesterday at Repub lican national headquarters. The letter attacked Charles E. Hughes' criticism of President Wilson as "nonconstructive" and propounded ten questions for Mr. Hughes to answer. In a letter to Mr. Hughes Mr. Mackaye

"My attention has just been called to an open letter addressed to you, printed in the New York Herald of August 2, signed by a number of professional writers, among whom my name is included. I beg to send you this word, to say that I did not sign the letter and never saw or heard of the letter until it was shown to me

It was stated at Republican headquarters that neither Mr. Hughes nor any of his staff had seen the letter except as it appeared in the news

PERTINENT PARAGRAPHS FROM HUGHES' SPEECHES.

"What is the President's polthe Executive ever had a policy for more than six months o the Mexican question?'

"If I am elected President I will see to it that American rights in Mexico are respected." "There is no man who could successfully present to an American community the platform that an American citize rights stop at the coast line." citizen's

"We will get through with this old strife between capital and labor. We are not laborers and capitalists in this country. We are fellow-citizens."
"All that the workingmen

want is a square deal."
"We want the United States efficiently managed. I want to see men in office who believe

in prosperity." "The Republican Party stands for a prosperity produced by sound American policies."

"We have removed from office men of experience and substituted others to satisfy partisan obligations. This must stop."  THE NATION IS SHOCKING-

It is apparent that we are shockingly unprepared. There is no room for controversy on this point since the object les son on the Mexican border. All (less, I believe, than 40.000) are there or in Mexico, and as these have been deemed insufficient the entire National Guard has been ordered out; that is, we are summoning practically all our movable military forces in order to prevent bandit incursions. In view of the warnings of the past three years, it is inexcusable that we should find ourselves in this plight. For our faithful guardsmen, with a fine patriotism responded to this call and are bearing this burden, I have rothing But I think it little short of absurd that we should be compelled to call men from offices and their professions for such a purpose. is not all. The units of the National Guard were at peace strength, which was only about one-half the required strength. It was necessary to bring in recruits, for the most part raw and untrained. Only a small percentage of the regiments rehave had even a year's training in the National Guard, which at the maximum means one hundred hours of military drill, and, on the average, means much Men fresh from their peaceful employments and physically unprepared have been hurried to the border for actual service. They were without equipment; without supplies; suitable necessary supplies; conditions of transportation were not provided. Men with dependent families were sent; and conditions which should have been well known were discovered after the event. And yet the exigency, comparatively speaking, was not a very grave one. It involved nothing that could not readily have been foreseen during the past three years of disturbance, and required only a modest talent for organ-That this Administraization. while pursuing its course in Mexico should have permitted such conditions to exist is alincredible.—From

Hughes' speech of acceptance.

Photographs on the Wing Germany has employed many inge nious devices in the great war, and surely one of the most unique is that of employing carrier pigeons for taking military photographs. ago the camera employed for this purpose was exhibited in Germany. It was invented by Doctor Neubronna. and was a wonderfully light instrument, weighing only  $2\frac{1}{2}$  ounces. The lens was only 2-inch focus, and the photograph produced measured 11/2 inches square. One of the models could take eight pictures in succession two-distinct cameras. The lens of one pointed forwards and the other backwards when the "carrier" was in In each case the exposure mechanism consisted of a rubber bulb containing compressed air, by the slow escape of which through a minute aperture a lever was operated to release the shutter at the end of an interval of time which could be deter-

#### LIVE STOCK AND LEGUMES

A ton of average Iowa or Illinois soil contains but a few pounds of actual Certility; that is plant food material which is available or ever can become available for the use of crops. The cemainder is simply waste material and cannot be used by plants as food.
When this fertility has once been ex-

Rausted, remember that it is gone forever and will not return except as it is purchased.

The actual value of soil is shown by the power to produce crops. This productiveness depends not only on the kind of soil, but upon the condition of it. The soil must be well drained, contain a sufficient amount of vegetable matter or humus and be worked, in order to be in proper physical condition to produce crops. These conditions are brought about principal-

by by tillage and crop rotation.

If it is possible then for the farmer to control the air circulation in the soit, its water-holding capacity, the Sectorial content, and its available of 53 bushels of corn per acre above the cost of growing. Estimating that Es sarely profitable for every farmer it will cost 25 bashels or about \$10 give his land careful, personal study so that the conditions in it are the best for the production of the least crops of the best covaling. In the cost of growing. Estimating that it will cost 25 bashels or about \$10 cash profit of 50 cents per bushel, of \$26.50 per acre. largest crops of the best quality.

Productive Land. On farms where live stock is kept, the land is much more productive than on farms where exclusive grain Carming is followed. Where the crop s sold on the market all of the plant food contained in the crop removed, is lost to the soil. Where all crops are sold, a practice familiarly known soid, a practice familiarly known producing an acre of corn.

Soil, "the result is, without fail, the impoverishment of the soil. This practice will result is what You Face!"

What You Face! the soil. This practice will result in Some of the crops will be marketed, but in the end you will find that hog is one of the most valued properties skins and steer hides are the best farm manure, and can be most ecograin sacks that you can have on the momically supplied by its use.

supply, and therefore the supply of available plant food, had been more nearly maintained in the rotation of the manured plots. A great difference in the color of the soil of the two plots at the Missouri station where corn had been grown continuously both with and without manure was noticeable. The unmanured plot was much lighter in color and of much poorer texture, thus showing very clearly its lack of humus as compared with the one beside it. It must

but it is the first essential, and the otation must include legume crops. Legumes are humus-building crops ecause in order to put humus in the oil, nitrogen is necessary, and these plants secure it from the air. This experiment shows clearly the advantages of live stock farming in

rotation alone will maintain fertility

naintaining soil fertility. Upon the plot where farm manure was applied with a rotation of corn, wheat and clover, there was a margin

In the second plot, where no manure was applied, with a rotation of corn, wheat and clover, there was a margin of 26 bushels above the cost of growing or a cash profit of \$13. On the plot where corn was grown continuously for 17 years, without ro

tation, there was a loss of \$6.50 per acre, or 13 bushels below the cost of

farm. Convert your grain and hay man should expect to make a crops into beef and pork and drive profit from farming by growing one it to market on the hoof. Alfalfa,

#### The Iowa Beef Producers tion carried on an investigation in Iowa covering a period of five years. was gathered from 20 Iowa in nine different counties Data farms in

throughout the state. (See chart.) On ten average live-stock farms 52 bushels of corn per acre were produced as against 36 bushels per acre produced on ten average grain farms. On ten average stock farms 39 bushels of oats per acre were produced, as against 32 bushels per acre on ten

average grain farms. Ten average stock farms produced 2.2 tons of clover per acre as against 1.2 tons per acre on ten average grain farms. These comparisons speak for themselves.

One-Crop System. A one-crop system will impoverish any country, and in turn it will impoverish the people that are on its 'arms. It is only through diversification of crops and the using of our energies every day of the year, that we can make a rich country.

Live-stock farming is diversified farming and calls for a system of crop rotation with legumes. It returns fertility to the soil. It adds interest to the work of the young people and finally it is best insurance of an in-come. The kind of live stock depends upon local conditions. First, the preference of the farmer, second, the environment. Cows, hogs, horses, mules, beef cattle and sheep, offer a large range of choice and fit into many con ditions. Horses and hogs are found on every farm and they become very profitable to the man who under stands them. Sheep raising and dairying may be combined as one herd or handled separately.

not be understood from this that crop In either case they will be found profitable. Varying combinations of live stock may be found profitable. Live-stock farming requires d deendable feed supply. Silage and alfalfa are an excellent basis. kafir, and other similar crops furnish

as his own vegetables. Also his own protein feed for his stock, and expend as little money as possible for bran, cottonseed meal, and other highpriced protein feeds.

Dairy Essentials.

The dairy business, too, calls for intellectual activity. Such exercise is good for the boys and girls. The dairy business evens up things on the farm. It gives steady employment. It is a cash business. A man feels independent when he knows that his income is steady. Dairying builds up the farm. It requires fewer acres and consequently leads to more neighbors. There is always an air of prosperity about a well handled dairy farm. The dairy business adds permanency to the community. The success of the man engaged in it depends upon keeping milk records. It costs but little and returns a hundredfold. There are good cows and poor cows. A farmer should find out which are the poor cows and which are the good This can be done by marking down what they produce each day, and using the Babcock test. Milk the good ws and sell the unprofitable ones for beef.

"Feed what you raise, and raise what you feed" has been the watchword of the best farmers in America for many years. It is the only safe

Living on the farm means more an most of us realize. Not just to live there, but to make it a home. The accompanying chart shows the Not just to grow corn, wheat and alfalfa, but for the benefits that may dren through the things that we pro-

GRAND AMERICAN HANDICAP

The Greatest Trapshooting Event of the Year, Won with Winchester "Repeater" Shells.

The Grand American Handicap, the trapshooting classic, equivalent to the World's Series in Baseball, the highest honor the world has to bestow in trap-shooting, the event that marks the climax in the trapshooter's career, was wen by Capt. J. F. Wulf, of Milwaukee, with the wonderful score of 99x100 from the 19-yard mark. In making this great win he shot Winchester "Reloaded shells.

The National Amateur Champio ship was won by F. M. Troch, of the State of Washington. Mr. Troch also took second place for National Amateur Championship at Doubles. He also won the Mound City Overture, and the General Average on all targets, and General Average on 16-yard targets. In winning all these events, Mr. Trochused a Winchester repeating shotgun.

The Women's National Champion thip, the first event of the kind ever staged at a Grand American Handicap, was won by Mrs. J. D. Dalton, of Warsaw, Indiana, with a Winchester reseating shotgun.

The Dunspaugh Trophy, emblematic of the Professional Championship, was won by Phil R. Miller with a Winchester repeating shotgun.

The Hercules All-round Amateur Championship was won by Edw. L. Bartlett, of Baltimore, with Winchester loaded shells. This was a hard match to win, as it called for 50 singles at 18, 20, 22 yards, respectively, and 25 doubles at 16 yards.

This was a great cleanup for Winchester guns and shells and a demon stration of their wonderful shooting qualities.

Mrs. E. B. Clarkson, ninety-six, Alton, Il., has not missed a Sunday school session in 36 years.

#### FINE INVESTMENT IN CALVES

Writer Tells of Profitable Experience in Buying Up Young Animals-Feed Cost but Little.

Now is the time for farmers who have more hay than they can feed, to ouy calves, for they will make a fine investment. At least my experience proves so, says a writer in an exchange. Three years ago we bought 12 calves, as we had more hay than we could use. It was cowpea hay. Usually at this time of the year some farmers have one or two calves for is the price we paid for ours. We turned them on pasture, and by the time pasture was gone they were in fair shape, as they were very poor when we bought them. That winter all we fed them was cowpea hay. In spring they were nice, sleek and fat.
Then about June and July we bred should be piled between layers of catthem to a fine registered Jersey bull.

All the calves were part or all Jerer of manure, as it is piled, should be

The manure was worth as much as the hay, for it is the best of fertili-

zers, thus getting a second use of it in raising a better crop and in building up the farm. Thus we were out the time in feeding the 12, which was not much, as all we had to do was to stuff hay in the manger twice a day and salt them once week. Water was plentiful. The next winter we fed them clover and cow pea hay, also corn stover, no grain, and they were in fine shape.

In the spring they had calves, of which we kept the females and sold the males. The calves were worth more than the handling of the cows. Then we had young, fresh cows for sale, which after the sale brought over \$50 each. Before selling we bred to our registered Jersey bull, which was ne of the best to be had.

#### CLEANLINESS IS BIG FACTOR

Special Care Should Be Taken to Prevent Meal in Corner of Boxes From Fermenting.

Cleanliness is one of the most important factors in feeding young Clean feeding pails, troughs, and stalls are safeguards against di gestive troubles. Milk should be fed only in clean pails, which should be washed and scalded after each feeding. All feed boxes should be kept clean. Special care should be taken to prevent meal from fermenting in the corners of boxes. Fermented or moldy feed will often upset the digestive system of a calf and endanger its life. No more grain should be fed than will be cleaned up in a few minutes. The bedding in calf stalls becomes wet very quickly. The calf them, stepping of a trolley car.

Then, when she realized her danger, should by all means be kept dry, and should by all means be kept dry, and the should by all means be kept dry, and the should by all means be kept dry, and the should by all means be kept dry, and the should be shoul should by all means be kept dry, and

#### WATER AND SALT NECESSARY

Important Requisites for Proper Manufacture of Milk, Says South Dakota Professor.

Don't stint your dairy cows on water, if you want them to keep up the milk supply, suggests Prof. C. Larof South Dakota State college. He states that the amount of water needed by a dairy cow is in proportion to the amount of milk she gives. The average cow will drink about 75, pounds per day, while some very large milk producers drink 200 pounds per day. The dairy cows should also have free access to salt. The right method of feeding salt is to have a water-tight box 10 or 12 feet long in the yard, on solid posts. Then put a whole barrer of salt in the box and keep plenty of it there all the time. The cow needs salt not only for her body but for the manufacture of milk.

#### COMFORT OF COW IMPORTANT Animal Should Be Made Comfortable and Willing to Part With Her Supply of Milk.

he cow be comfortable and contented. She should have consumed at least a portion of her food before the milking begins, so she will have been satis fied and willing to part with her milk.

It is also well that clean, fresh water be offered her before the milking proc-Two-Man Dairy Farm.

by the department of agriculture in licate that under average condition in eastern Pennsylvania a dairy farm of 100 to 120 acres is about the proper size for a good two-man farm.

Cows Help Build Up Soil. Cows produce food, but do not impoverish the soil. In fact, with the proper care and attention, one should be able to build up the soil year after year with dairy cows and at very reaable expense

#### APPLICATION OF MANURE AND FERTILIZERS

DISTRIBUTING MANURE IN PROPER MANNER.

ground and well worked into the soil horse loads to the acre with the harrow. Harrow both ways There is a great diff sale for about \$10 to \$15 each, which is the price we paid for ours. We loads of manure to load, haul and for all. The small grains and grasses spread spring and fall; a two-horse spreader should be used. The manure given a thick coat of land-plaster. The plaster holds the ammonia and helps

to rot up the manure. Heavy soils will be greatly improved and capable of holding the rainfall by spreading, say 14 to 16 two-horse loads of long straw stalk manure to the acre on top of the ground and plowing under as fast as it is spread.

Barnyard manure, when rotted, be used. It should be spread early in should be spread on top of the plowed October, and quite thin-about six two-

There is a great difference in land

require manure near the surface It is a good plan to use both animal can be spread thick or thin. The manure and fertilizers for wheat, say lumps are broken up fine and spread six two-horse loads of rotted manure evenly over the ground. Fresh horse and four hundred nounds of high-grade bone fertilizer, drilled in with the grain, to the acre. This method will give larger yield of grain and a thick set of timothy and clover. This practice is coming into favor with practical grain growers. It is the usual practice among our successful truckers and market gardeners, and it is a good one.

The old method of dropping manure in small piles over the plowed field to be spread by hand and harrowed in is a slow and laborious prace For top dressing late seeded grain and grass, fresh horse manure should and it costs too much to spread it. tice. The manure is not properly spread

#### ARRANGE BUILDINGS MORE CONVENIENTLY

Location Has Much to Do With Time Required to Perform Certain Work Around the Farm.

(By W. C. PALMER, Agricultural Editor North Dakota Agricultural College.) The location of the buildings on a farm has a great deal to do 37th the time required to do the work. It will often pay to move some of the buildorder to secure a more convenient arrangement. This was done on one farm, with the following results. Under the old plan, it required walking 53 miles a year, just carrying in water. Under the new plan, the water was piped into the house-no walking required. Bringing in the wood under the old plan required walking 22 miles. Under the new arrangement, this was reduced to eight and three-fourths miles. The trips made to the machine shed during the year amounted to fifty-seven and one-third miles; by the new arrangement, it was reduced to eleven and three-fourth miles. By the new arrangement, the year's trips in feeding the hogs was reduced 102.5 miles, and in caring for the chickens, three miles were saved. The total saving for the year through rearranging the farmstead was 217.3 miles.

was worth \$36.74. It must be rememwalking these miles, but it was usually with something to carry.

#### NITRATE OF SODA AS TEN GOOD REASONS POTASH SUBSTITUTE

Continuous Growing of Same Crop on Piece of Land Draws Heavily on Plant Food.

Retation of crops is the best plan to follow because the continuous growing of the same crop on a piece of land draws heavily upon certain kinds of plant food. Dr. William P. Brooks, director of the Massachusetts station, says that nothing will wholly take the place of potash for crops, but next to that would be nitrate of soda, for the chemical action of soda tends to unloose potash in the soil.

Acid phosphates should also be used. At the present price of potash corn stalks are worth \$10 per ton for the potash in them. The effect of lime on crops has been exag gerated. It is injurious rather than beneficial in growing tobacco, but is better for onlons, and he rece it for this purpose. Land plaster is better than lime for tobacc

#### DON'T HURRY TO FILL SILO

Green Feed Often Better When Per mitted to Settle a While-Wait for Maturing Corn.

It is not essentia! that the silo be filled at one time. Many farmers have found that it is best to let silage settle a while before putting too much of top of it. Some run the cutter on top of it. day and let it stand the next. If enough corn is not ready for filling it entirely It is very well to wait for another field

Watch the Trees Carefully. Pear blight very often affects apple trees: and whenever it is discovered every particle of the diseased parts should be cut out, or if very bad the the hog farm. entire tree should be destroyed.

Money Lost in Selling. Money Lost in Selling.

What does it profit a man if he the most expensive thing on the farm. raises the best crop in the country and loses money in 'he selli 3?

Cultivate Celery. Keen the soil loose and mellow colery plants.

#### HULLESS OATS GIVE ONLY SMALL YIELD

Until Further Improved They Hardly Seem Worthy of Attention From Grower.

The Washington experiment station btained a small quantity of hulless oats from the United States department of agriculture in 1904. These and other hulless varieties have been tested with the ordinary ones, which have hulls on, for the past several years. The average yield for a two years' test in the grain nursery shows that Chinese hulless oats, one of the most common varieties, produced 43 per cent of the yield of Swedish Select oats. An improved hulless oat which was produced at the Washington experiment station by crossing the Chinese hulless on the Palouse Wonder oat, produced 72 per cent of the yield produced by Swedish Select during the ame two years. The best hulless oats under field con-

ditions produced only 53 per cent of the yield of Swedish Select. Besides producing a low level, most of the hulless varieties have a tendency to shatter badly and are often susceptible to : nut, thus further reducing the yield of the harvested crop. Attempts are being made to improve these It was also figured up and found bulless varieties by crossing them on that at living wages, that the time some of the better yielding varieties. Until hulless oats are further improved they would hardly seem to be worthy bered that it was not only a case of of attention from the grower, except walking these railes, but it was usually where they are to be used for a special

## FOR BUILDING SILO

Professor Skinner of Purdue Tells Why Every Farmer Should Have Huge Receptacle.

Ten reasons why every farmer who eeps live stock should have a silo, written by Prof. J. H. Skinner of Pur-due university, should afford some sellng argument for dealers. They are as follows:

1. The silo preserves the palatability and succulence of the green corn plant for winter feeding. 2. It helps to make use of the en-

tire corn plant. capacity of the farm.

4. Silage is a good summer feed when pastures are short. 5. Because of the small amount of

ground space required by the silo it s an economical means of storing for-6. The silo prevents waste of corn stalks, leaves and husks, which contain about two-fifths of the feeding

value of the corn plant. 7. The silo located near the feed uanger is an assurance of having feed

veather. 8. The silo assists in reducing the ost of grains in fattening cattle and

9. Silage greatly increases the milk low during the winter season and decreases the cost of production. 10. There are no stalks to bother e manure when corn is put into

the silo.

Excellent Hog Forage. Rape, clover and corn fed in connec-tion with bluegrass pasture comprise an excellent forage crop rotation for

Cheap Harness Is Expensive.

# portant Consideration.

HAVE LAWN CENTERS OPEN

Proper Placing of Trees and Shrubs Should Always Be Made an Im-

Let your lawn centers remain open and clear that the whole yard may appear as large as possible; generous, yet well framed with plant shrubs and trees on all sides. If you must have a Phoenix Canariensis on a 40-foot lot, place it in the rear where it may also serve as a shade tree, though the same rules properly should obtain in the back yard as in the front yard. Better to use fan palms if you will have some, or the beautiful columnar Do not plant in the center or centers so that one or two large objects may alone be viewed by you but frame your greensward or picture with shrubs, even trees, so that you will have a little privacy and snug ness, a limited seclusion, so that you feel as though on your own property This open-face, look-at-me type of gardening so prévalent is not at all con clusive to home life, and is founded not on generosity and unselfishness but on false pride and a desire to "show off." Every true plant lover has at least a part of his grounds se cluded; and somewhere on the premises may be found, if of sufficient extent, some suggestion of intricacy of design, without which no garden is very interesting or attractive unless in a spectacular sort of fashion, and the latter is debasing to the art.

#### DEMAND FOR SHADE TREES

Massachusetts Journal Recognizes the Value of Proper Adornment of the City's Streets.

A real good hot summer day brings home to Bridgeport the shame of shadeless streets. In this case it is a burning shame, and no mistake, vonder what administration will develon the foresight and public spirit to take the steps necessary at the pres for the assuring of shade trees for the

Shade trees add to the value of prop-Shade trees and to the value of property. They help to keep the city cool in summer. They conserve public health and comfort. They please the eye and are one of the greatest factors in the beautification of a city. People have an instinctive apprecia tion of trees—all the world knows that New Haven is a city of elms, and the most famous street in Germany is "Un-ter den Linden." Poets have rhapsodized over trees, and Handel wrote his famous "Largo" in celebration of a plain tree, which afforded grateful shade to the composer. And the practical advantages of trees are equal to the esthetic advantages. But it is unnecessary to cite these facts, because practically everybody agrees. is needed is the taking of definite steps to assure shade trees in the future and to counteract the lack of such a provi sion in the past.—Bridgeport (Mass.)

Wherever there is a wild rose hedge should be retained and encouraged, if the blossoms are of a good shade Otherwise one should try to get in more pleasing variety. Wild roses dif-fer enormously in their color tints ranging all the way from very pale to a very deep and beautiful pink. Evidently there are a great many varie ties among wild roses. There is a fixed belief that wild roses will not stand being picked. The writer one Sunday morning attended church in Minneapolis, where wild roses were twined in great profusion about the pillars and balconies of the church. They were there by the thousands and had been there for many hours. They retained their freshness throughout the day. The secret of their retaining freshness was that they had been gathered very early in the morning be-fore sunrise and while covered with dew. Some varieties of wild roses seem to bloom till very late. The writer has picked wild roses as late as September, and in Cook county, too!

Councilwoman at Work A fight against the unsightly, un-

sanitary and value wrecking billboards of Los Angeles has been reopened by Estelle Lawton Lindsey, councilwom an of that city. Mrs. Lindsey announced recently that she would at once renew the fight to bar the billboards from the residence districts and would ask the council to pass the ordinance barring them. This measure provides that the consent of a majority of the property owners in the same block must be obtained be-fore a billboard may be erected in a residence district. The Chicago ordinance was the model for this Los Angeles bill and the supreme court of Illinois upheld the measure in Chicago, but the billboard posters appealed to the Supreme court of the United States and the case is still pending.

Civic Co-operators. Under the Chicago Industrial club's an, 2,500 persons have enrolled as civic co-operators, giving practical alin civic helpfulness. It is said that not one instance of overofficiousness of meddlesome interference has bee noted since the plan was inaugurated

Thwarted Elegance. "I tell you," said Farmer Corntos sel, "this military discipline is jes what my boy Josh needed." "They tell me his equipment wasn't

#### Save the Babies.

NFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven per cent., or more tiza one third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities deadly poisons. In any quantity, they superfy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly. opens the causes the blood to circulate properly, opens the pores of the skin and allays fever.

Genuine Castoria always bears the signature of Castoff Flutchise causes the blood to circulate properly, opens the pores of the skin and allays fever.

Gratification.

"You go to church more frequently than you used to." And apart from the instru

tion I derive a great deal of satisfac tion from my attendance. It's a great comfort to be where people sing and play fine music without anybody's spoiling it by putting in ragtime words wanting to dance."

#### ONE CENT TAX OFF

If you waited until 12.01 a. m. Sunday to make that long distance 'phone call or to send that telegram, you probably noticed the odd cent you had been paying on either one, was not asked for. And if you took out insurance on your health, life or property any time after midnight Saturday night, you didn't have to pay umpsteen dollars plus one or more odd coppers.

The reason was that the new revenue bill, passed just before Congress adjourned, automatically repealed all the various stamp tax items that harried you because of the 1914 emergency revenue measure. It went into effect at midnight Saturday night.

There is no stamp tax on anything in the new revenue law. Under the 1914 emergency act there was one cent, or two cents, or three cents-as the case might be-extra charges for lip rouge, perfumery, talcum powder, 'phone calls, etc.

A penny or three extra on all kinds of express and freight packages had to be paid before. It isn't done any more. There is a modicum of comfort in the new act for folks who chew gum. Under the 1914 act 1-8 of a cent stamp tax was charged on every five-cent package of gum, and gum makers were talking of "shortening the loaf". That's knocked out in the new act.

Some other stamp taxes repealed include: One cent stamp on Pullman tickets, either lower or upper; taxes on custom house receipts for bonded goods; taxes on stock exchange transactions, on all bonds issued by corporations, or

all conveyances, deeds of trust, etc. The tax on the Pullman tickets sounds small, but it meant \$200,000 or \$300,000 annually in revenue to the Government. The tax on insurance policies was small, but that meant \$4,500,000 revenue. All told, the stamp tax meant a difference of about \$15,000,000 a year in the

#### RECORD OF HUDSON SUPER-SIX

The Hudson Super-Six smashed all records across the continent from San Francisco to New York. Five days and three hours, 31 minutes being the time to make the trip. The Hudson Super-Six stock touring car which left San Francisco at 1201 last Wednesday morn ing was checked in at Columbus circle by a representative of the American Automobile Association Monday morning at 6.31. This lowers the best previous record for transcontinental automobile run by fourteen hours fifty minutes. The average for the 3676 miles was 28.14 miles per hour. A. H. Paterson, of Stockton California, drove from San Francisco to Elks, Nev. Ralph Mulford took the car from there to Laramie, Wyoming. A. H. Paterson picked up the car and took it into Omaha. Mulford then drove it to South Bend, Ind., and C. H. Vince drove the last lap of 910 miles into New York, Mulford to avoid death to himself and two passengers drove head on into a herd of cattle that blocked a bridge, and two cows were killed. The accident delayed him four hours, but aside from a damaged radiator and lamps the car came through in first-class condition

their beauty and completeness.

shop; copies of fine Models from New York and Philadelphia; also of Sport Hats of the latest makes from London. Children's Millinery of various kinds; Untrimmed Hats and Trimmings in a great variety of shapes and stylesno two Hats alike, each one being a distinctive type in

**Autumn Millinery** 

**Opening** 

will hold our Autumn Millinery Opening and give the

ladies a peep at the latest Fall Millinery Fashions in all

have long since voted Fogel & Burstan their Millinery

Headquarters where high-grade workmanship, up-to-date

styles, variety and quality are to be found as nowhere

else short of the large cities. Year after year we have

spared neither pains nor labor, nor yet money, to win

this distinction, each year as the four seasons draw nigh,

keeping in close touch at the Fashion centers with the

very latest and best things of every description in Millin-

fore we shall have the pleasure of welcoming our patrons

to the largest and choicest Exhibition of Millinery, Suits,

This Autumn is no exception to the rule, and there-

On Tuesday and Wednesday, September 26-27, we

The ladies of Middletown and many miles around

#### Ladies' Fancy Coats

The materials are fancy mixed cloths in small plaid and over-plaid effects; plain and diagonal cheviots; broadcloth, wool velour and Bolivia cloth in navy blue and black. About full length, or a length just below the knees; deep, cape-like collars, roomy sleeves; loose models in belted or sweeping styles, with handsome linings. Prices \$5.00 to \$20.00.

### Ladies' Fall Suits

We have never shown a finer collection of tasty Fall Suits than those in this Opening. Materials are broadcloth, serge and gabardine in black, blue, navy or brown; some smartly belted, some with over-collars of plush or velvet and all in the new long coats style. Prices from \$12.50 to \$25.00.

#### Ladies' Dresses

Serges, and serge-and-silk in all the above colors and variously trimmed after the very latest modes; Taffetas in black and navy blue; satin-and-crepe Meteor Dresses; silk poplins-all of the newest makes. Prices \$5.00 to \$15.00.

#### Ladies' Waists

There will be a lively choosing when we show our fascinating variety of Waists in crepes, chiffons, taffetas and many pretty combinations; black, white, light and dark colors. Prices \$2.00 to \$5.00.
